STYLE, SELECTION & CRAFTSMANSHIP

Holmes Garage Door Company® offers a complete line of top quality doors including traditional raised panel doors, carriage house style doors, contemporary styles and commercial. With thousands of garage door designs to choose from, Holmes is Making it Easy to find and purchase the right door for your style!

3 THINGS TO CONSIDER WHEN CHOOSING YOUR NEXT GARAGE DOOR

1

CURB APPEAL

A garage door can represent as much as 30% of your home's front façade. Homes with forward-facing garages see immediate curb appeal.

2

VALUE

A new door can increase the value of your home by up to 4%.

3

ENERGY EFFICIENT & DURABLE

If your garage is attached to your home, an energy-efficient door can do more than lower energy costs; insulated doors are also quieter and more durable.

SAFETY, QUALITY & INNOVATION

WARMER

Industry-leading R-values of up to 20.4 provide year-round comfort and energy savings.

QUIETER

Just open a non-insulated garage door and then an Intellicore door, and you'll hear a huge difference.

STRONGER

A Holmes garage door featuring Intellicore is nearly twice as strong as a polystyrene door of the same thickness, so it will look better, longer.

Look for this symbol on select products that feature Intellicore®.

Deep Embossed Panels

Natural woodgrain texture and detailed raised panel design enhance door's beauty.

Coped Edges

Custom Crafted Steel doors are designed with stylish beveled coped edges and decorative center grooves.

Ultra-Grain® Finish

Ultra-Grain® delivers the best of both worlds—the realism of natural wood with the low maintenance and energy-efficient benefits of insulated steel.

Decorative Windows

Inspired by current architectural trends, our windows add a new look to garage doors while complementing your home.

Rust-Prevention System

Unsurpassed rust-prevention system creates a virtually maintenance-free surface.

EZ-SET® Torsion Springs

Patented springs for easier, faster and safer installation. Eliminates the labor intensive and dangerous manual winding process.

Model Shown: Silver Series 5500 with Short Plain Windows

3 EASY STEPS TO CHOOSING YOUR NEW DOOR

1 CHOOSE YOUR DOOR STYLE

SPECIALTY OR **STANDARD STEEL**

See page 5 for examples of each door style.

2 CHOOSE YOUR CONSTRUCTION

DOOR CONSTRUCTION

	2" Polyurethane	1-3/8" Polyurethane	2" Polystyrene	1-3/8" Polystyrene	1-5/16" Polystyrene	Steel
FEATURES

CONTEMPORARY COLLECTION

Contemporary Collection doors combine aluminum and glass to create a sleek, modern look. Many glass and panel combinations are available for varying degrees of privacy.

DURABLE CONSTRUCTION

**MODERN DESIGN...
VIRTUALLY MAINTENANCE-FREE**

Model Shown: Contemporary Collection Model AVI with Ultra-Grain® Dark Cherry Frame and Insulated Frosted Glass

Model Shown: Contemporary Collection Model AVI with Anodized Black Frame and Insulated Frosted Glass

CONSTRUCTION AND FINISH

- 2-1/8" thick, virtually maintenance-free, long-lasting aluminum frame.
- Most glass is acrylic or tempered. Available in single pane (Model AV) or insulated (Model AVI). NOTE: Non-insulated 1/4" mirrored or White laminate is available on Model AVI only.
- Model AV available with acrylic or non-insulated 1/8" tempered clear or frosted glass or solid aluminum panel options.
- Model AVI available with insulated tempered, non-insulated 1/4" mirrored or White laminate glass options.
- Tongue-and-groove joints and bottom weatherseal in a rust-proof aluminum retainer helps seal out the elements.
- Frames come standard in clear anodized or painted White, Commercial Brown or Bronze. Optional anodized Black, Ultra-Grain® finishes or powder coated available (additional cost).

Lodgewood[®] COLLECTION

The Lodgewood[®] Collection combines authentic wood designs with the functionality of an upward-acting sectional door.

HANDCRAFTED
TWO-LAYER CONSTRUCTION

**EXTRAORDINARY CRAFTSMANSHIP...
IMPRESSIVE APPEARANCE**

Model Shown: Lodgewood[®] Collection Design 2 with SQ24 windows

CONSTRUCTION AND FINISH

- Handcrafted 2-layer non-insulated wood doors in authentic carriage house designs. Swing-out appearance – modern operation.
- Available in 3 wood species. All stain grade wood rails, stiles and panels are made from Redwood, Cedar or Hemlock. Hemlock (paint grade and grooved) doors have Hemlock stiles and rails with exterior grade MDO plywood panels.
- 1/4" thick imported Luan interior backer glued to stiles and rails.
- True divided windows are standard with 1/8" DSB glass. Specialty glass options available.
- All doors can be factory primed or finish painted white. Factory stain available for stained grade wood species (additional cost).

WARRANTIES

DECORATIVE HARDWARE

Standard

Optional

OPTIONAL FACTORY STAINING*

Not all wood types stain equally and all stain colors will vary in appearance on all wood types. Variations in color will occur from printed material to actual doors, or even from door to door.

**Additional cost.*

Proper care and maintenance are imperative to the appearance, longevity and performance of all wood doors. Doors must be painted or stained on all six sides prior to installation. Failure to follow the installation and maintenance instructions will void the warranty. Please refer to the installation and maintenance manual for additional information about caring for a wood door.

HOW TO MEASURE YOUR DOOR

1. Measure existing door width and height in feet and inches. This determines the size of door needed. The rough opening should be the same size as the door.

Width: _____

Height: _____

2. Measure for sideroom: 3-3/4" is required on each side for installation of the vertical track for standard extension or torsion springs, or EZ-SET® Torsion Spring. 5-1/2" is required for EZ-SET® Extension Spring.

Sideroom: _____

3. Measure area labeled "headroom" – distance between the top of the door opening ("jamb header") and the ceiling or lowest obstruction (e.g., opener, beams or light fixtures). 10" is required for standard installation of extension springs and EZ-SET® Extension Spring; 12" on standard torsion springs and EZ-SET® Torsion Spring. 14" of headroom required for carriage house doors. If you have restricted headroom, special hardware is available. Low headroom hardware is available to reduce requirement to as low as 4-1/2" (minimum with standard extension spring or EZ-SET® Extension Spring). EZ-SET® Torsion Spring low headroom requirement is 9-1/2". Note: If door height extends above the opening, the headroom measurement should be adjusted accordingly.

Existing headroom: _____

Headroom needed: _____

4. Measure area labeled "backroom" – distance is measured from the garage door opening toward the back wall of the garage.

Backroom: _____

Common garage door sizes include 8' wide x 7' high, 9' wide x 7' high, and 16' wide x 7' high. Holmes manufactures most doors in nearly any size you require.

HOW TO MEASURE DIAGRAM

For answers about choosing, installing and maintaining Holmes Garage Doors, visit us at www.holmesgaragedoor.com or call the Holmes Helpline® at 800-557-0488.

In the interest of better quality and value, we are continually improving and updating our products. Consequently, photos, illustrations and available options may sometimes differ from present models.
