AGRICULTURE

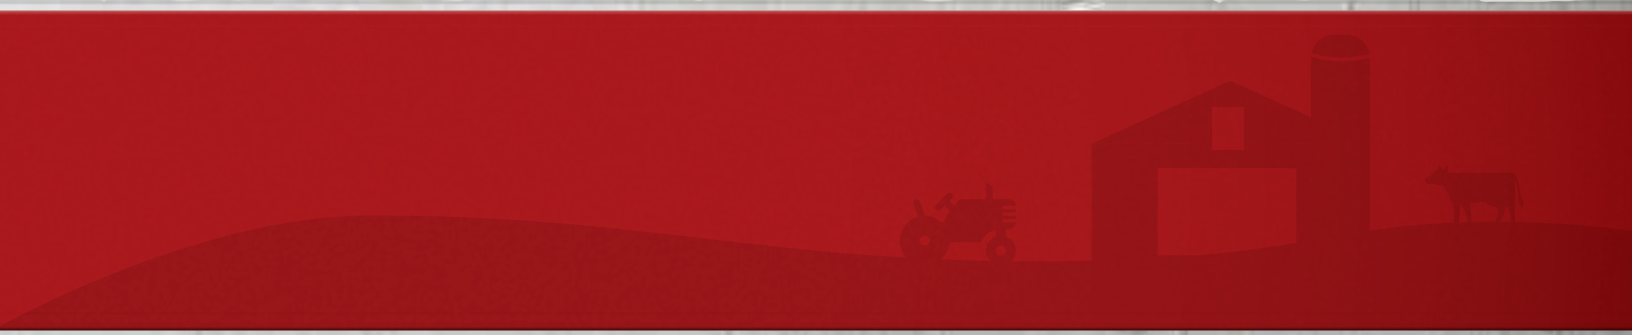

Evergreen roof and Light Stone sides

It beat the rain... now keep it dry!

Post frame construction designs allow for larger buildings at lower material and labor costs than traditional timber framing techniques.

Developed and matured in the 1930's, post frame agricultural buildings come in all shapes and sizes and are the time-tested, cost-effective method for protecting your equipment from the weather.

Brite White sides, Scarlet Red roof trim and wainscoting

Bone White sides, Charcoal roof, trim, and wainscoting

POSTS & LUMBER

THE GREEN POST

A.B. Martin is a supplier of the **Green Post**. The Green Post provides superior protection against in ground post decay and rot. Patented notch design provides superior wind uplift resistance. Environmentally friendly. Prevents the preservative chemicals in treated post from entering the soil.

GLULAM POSTS

There are several options when choosing posts. Normally when the post is 16' or less it is more economical to use a solid 4"x6" or a 6"x6" treated post. Otherwise it is recommended to use a **GluLam** laminated post. GluLam posts have consistent dimensions, are straighter, and available in longer lengths (up to 40') than a solid sawn post. GluLams are also resistant to twisting, splitting, and checking. GluLams are pressure treated on the bottom 6' only and Southern Yellow Pine on top.

Dimensional Lumber

1" x 4"	2" x 4"
1" x 6"	2" x 6"
1" x 8"	2" x 8"
1" x 10"	2" x 10"
1" x 12"	2" x 12"

Treated Yellow Pine

2" x 4"
2" x 6"
2" x 8"
2" x 10"
2" x 12"

T&G Barn Siding

1" x 6"
1" x 8"

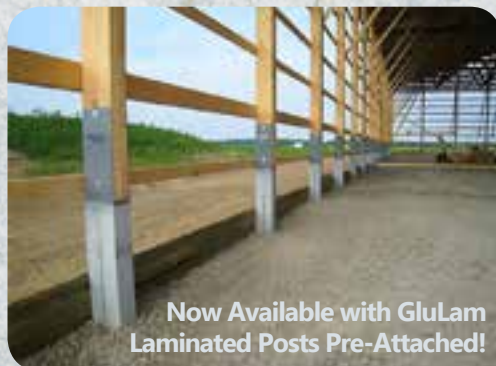

Plywood & OSB

All standard sizes in stock

Sturdi-Wall Drill Set Brackets

Heavy duty, drill-set anchor system. Designed to connect post frame structures to existing traditional concrete foundations.

Now Available with GluLam Laminated Posts Pre-Attached!

Perma-Columns

5ft. precast concrete columns that keep wood out of the ground. The economy of post frame construction with the durability of concrete.

Sturdi-Wall Plus Wet Set Brackets

Heavy duty, wet-set anchor system designed to connect post frame structures to traditional concrete foundations.

TRUSSES, DOORS, & WINDOWS

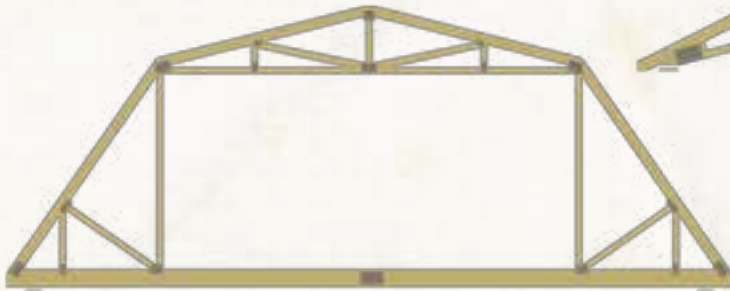

All standard in-stock trusses are $\frac{4}{12}$ pitch with a 12" overhang. They are designed to be installed 4' on center. They have a 110 MPH wind load and 30-5-5 pound load rating with no deductions. The lengths in stock are as follows: 20', 24', 28', 30', 32', 36', 40', 50'. Other custom order trusses are available with varying lead times.

Standard Truss (In Stock)

Attic Truss
Great for extra storage space.

Gambrel Truss
Available with attic room for even greater storage space.

Scissors Truss
Gives added ceiling height.

Mono Truss
Great for lean-to or Run-in sheds.

**MANY DOORS &
WINDOWS IN-STOCK**

METAL ROOFING & SIDING

ABM Panel

Our most popular metal panel is by far the heavy-duty and long-lasting **ABM Panel**. This specially coated panel reflects as much as 83% of the sun's energy away from the roof, resulting in a cooler building in summer, more energy savings, and greater comfort. Available in 25 ENERGY STAR rated colors with 40-year paint warranties.

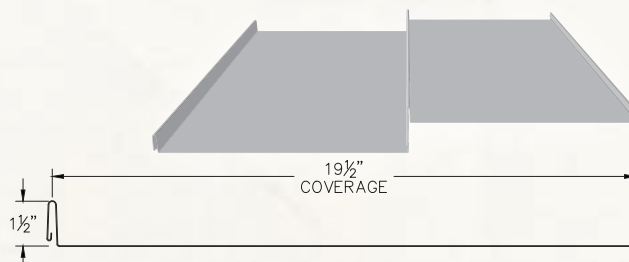

COMMON APPLICATIONS

Agricultural, Residential, and Commercial Roofing & Siding

KEY FEATURES

- **Premium 28^{ga}. Steel:** Premium 28^{ga}. steel measured before paint (also available in the heavier 26^{ga}. steel)
- **Heavy Zinc Coatings:** More Zinc means more rust protection
- **Excellent Paint Bond:** Premium G-100 - Zinc Phosphate makes for a strong paint bond and corrosion protection
- **Paint Warranties:** Premium G-100 comes with a 40-year Valspar paint warranty + 10-year edge-rust warranty
- **Heat-Formed Panels:** Practically eliminates the first point of failure by reducing the microscopic paint cracking
- **Large Minor Ribs:** Strengthens panel and improves appearance
- **Energy Efficient:** Reduces heat transfer resulting in less heat penetration in summer and less heat loss in winter
- **Recyclable:** Panels are 100% recyclable after a long and useful life

ABSeam Panel

Our durable 24^{ga}. **ABSeam Panel** is the ultimate choice for a beautiful, long-lasting roof for residential, commercial, agricultural, and equestrian buildings. No screws or punctures are visible or exposed to the elements (less opportunity for leaks) thanks to the ABSeam clip system or the optional nailing fin. This panel is a popular choice with new construction and restoration projects nationwide.

COMMON APPLICATIONS

Agricultural, Residential, and Commercial Roofing

KEY FEATURES

- **Rib Height:** Comes standard with 1.5" ribs. It can be customized to a 1" high rib
- **Heavy Gauge:** Made with 24^{ga}. galvanized steel (also available in galvalume steel)
- **Warranty:** The prepainted Kynar finish has a 40-year limited paint warranty
- **Energy Efficient:** Reduces heat transfer resulting in less heat penetration in summer and less heat loss in winter
- **Recyclable:** Panels are 100% recyclable after a long and useful life

CUPOLAS & SNOW GUARDS

A.B. MARTIN CUPOLAS

Available in 16", 24", 36", and 48" square. Custom made to match color and roof pitch of your building. Windows are optional in 3', and 4' cupolas. Pre-assembled for easy installation. Many weather vanes in stock.

Snow Defender's stainless steel snow guards provide long lasting protection against melting snow. Easy to install. 16-gauge stainless steel. No caulk needed because the EPDM rubber sealer comes pre-attached. Available in multiple colors.

COLORGARD®

The only snow retention system good enough to be warranted for the life of the roof. Unlike other snow guards that yellow and fail over time, ColorGard's unsurpassed holding strength controls snow migration with a perfect color-match that lasts the life of the roof. 8' rails for Standing Seam or Exposed Fastener panels

INSULATION

**Are You Ready for the Weather?
Don't Wait. Insulate!**

Your Insulation Headquarters
