SNUGGERS AND BOLTS

	Description	Part No.	Ctn. Qty.	U o M	Weight (ea.)
	Metal Vertical Door Center Snugger: The chains sliding down the diverging rods draws the verticals closer together, both adding strength against wind damage and helps to eliminate door rattle. Can be used with either wood or metal horizontals. When used in conjunction with the center stop and hold down, the bottom horizontals are locked over the center hold down, giving maximum protection against doors lifting out of guide. Packaged in plastic bag with mounting brackets. One required with each double leaf door.	711200	16	each	2.0 lbs.
	Metal Vertical Door Side Snugger: The chains sliding down the diverging rods draws the door tight to the jamb, giving excellent protection to the door from wind damage and helps to eliminate door rattle. Can be used with either wood or metal horizontals. Packaged in plastic bag with installation instructions. Two required per opening.	711201	16	each	1.8 lbs.
	Wood Frame Door Snugger: As the wind rattles the door, the chains move down the diverging rods, pulling the door tighter and verticals to secure center of split doors or to jamb to secure sides of door. Two required for single leaf door, three for double leaf doors. For doors using up to 2" x 6" verticals. Packaged in plastic bag with installation instructions.	643404	16	each	2.4 lbs.
