S-5![®]
The Right Way!
STOCKING DISTRIBUTOR

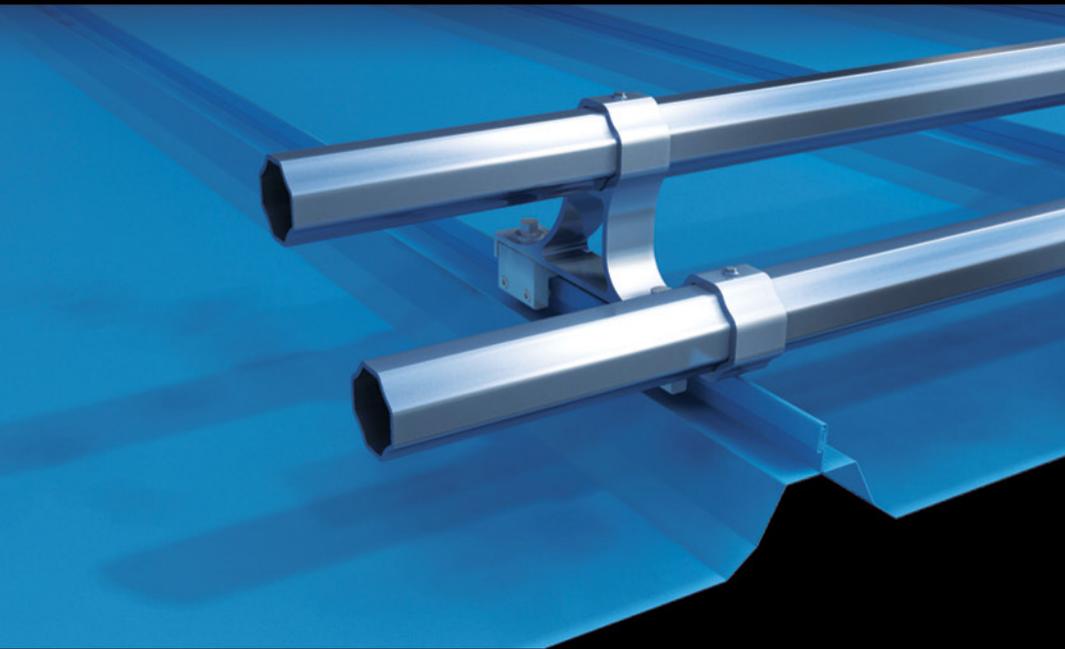

A. B. MARTIN
ROOFING SUPPLY, LLC

Snow Retention • Metal Roofing Accessories

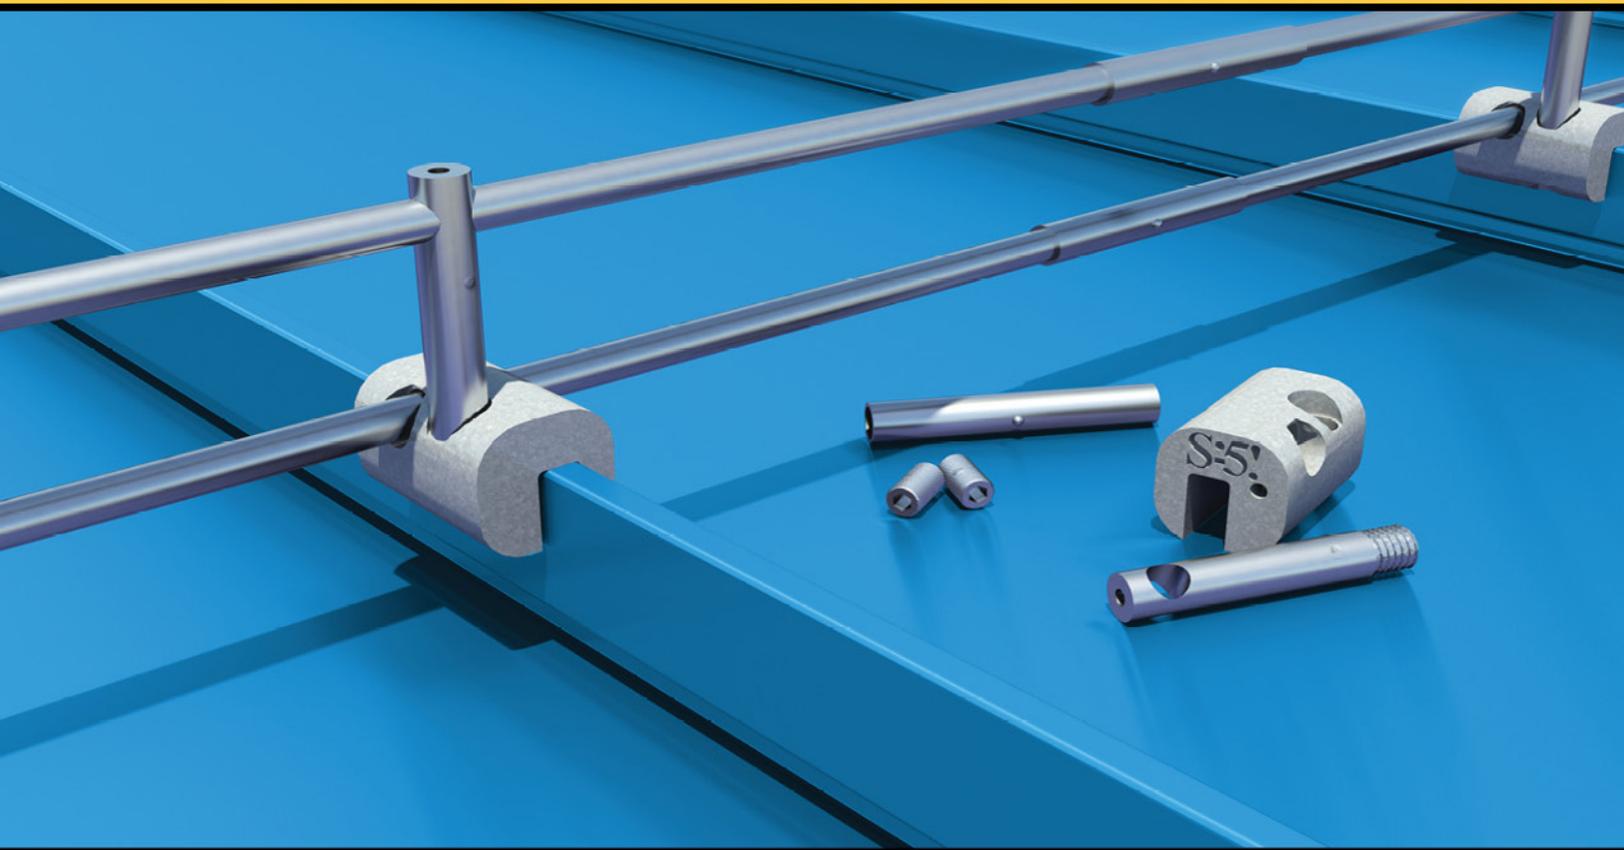

ColorGard[®]

The only snow retention system good enough to be warranted for the life of the roof. Unlike other snow guards that yellow and fail over time, ColorGard's unsurpassed holding strength controls snow migration with a perfect color-match that lasts the life of the roof.

X-Gard[™]

It can be designed as a one - or two-pipe system spanning up to 42" seams. Tests have proven the X-Gard[™], with the amazingly strong NeX-Pipe[™], to be the strongest pipe-system on the market.

SnoRail/SnoFence

Offered in aluminum or brass, the S-5!® snow fences are designed to manage snow migration on standing seam metal roofing. Their clean lines, cylindrical shapes and high-tech appearance make these snow guards the favorite choice of architects and roof designers.

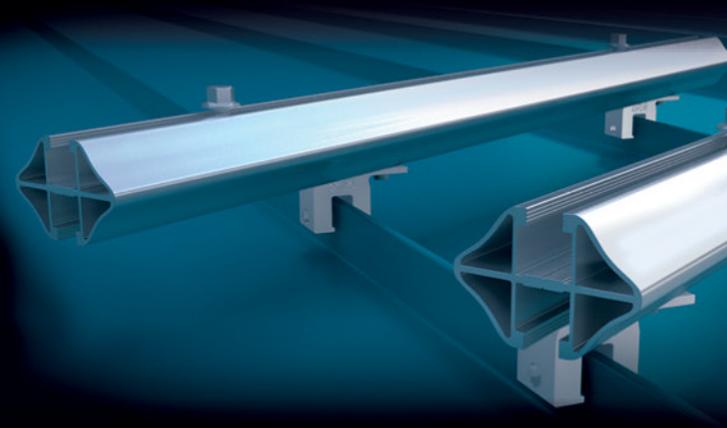

S-5!®

The Right Way!

STOCKING DISTRIBUTOR

S-5!® Family

AS-5!® clamps attach to the panel seam by the tightening of two “bullet-nosed” stainless steel setscrews against the seam material. (This is usually done with an industrial grade screwgun.) The setscrews compress the seam material against the opposite wall of the clamp. They will “dimple” the seam material, but will not penetrate it. Threaded holes in the clamp (and stainless hardware provided) enable the easy attachment of various ancillary items to the clamps.

Utility System

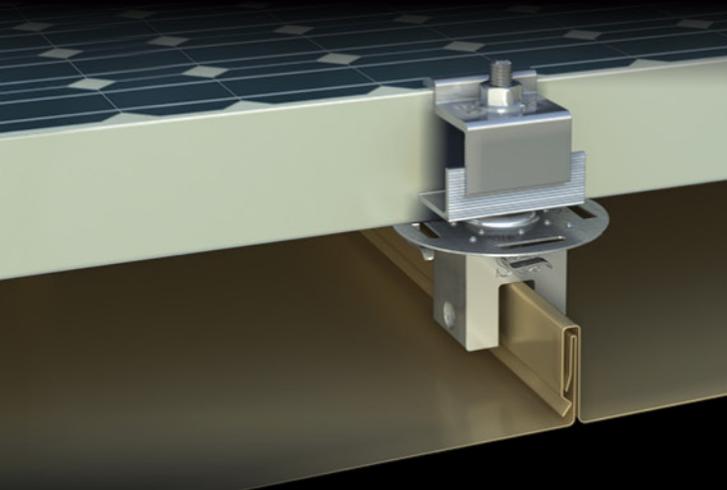

The most versatile utility mounting solution for standing seam metal roofs, the Utility System enables easy attachment of almost any conceivable utility application, including: signs, banners, light fixtures, gas piping, antennas, roof walkways, HVAC equipment, lightning protection systems, condensate lines, stack/flue bracing, fascias, equipment screens, electrical conduit, antennas, cabling, and more.

S-5-PV Brackets

The new S-5-PV Kit is one of the first solar module mounting solutions in the industry to be listed to the new UL subject 2703, a standard that covers both bonding and mounting. In order to meet the UL requirements, the S-5-PV Kit had to be submitted for tests, being evaluated under the severest of conditions to confirm that the product would withstand the elements while maintaining electrical conductivity.

Furthermore, the S-5-PV Kit has gained an ETL Listing to UL 1703. UL and ETL listings are widely recognized by most Authorities Having Jurisdiction, which means fewer inspection hassles for installers.

With the new S-5-PV Kit, the module is simply anchored with the kit and automatically provides a ground path in the module frame. No lugs or wire required except to connect one string of modules to another and to ground the system. This connection detail represents installed electrical cost savings of \$6-\$12 per unit.

EdgeGrab™

S-5!'s new EdgeGrab™ is specifically designed to be used in conjunction with our patented S-5-PV Kit for solar array end conditions.

The EdgeGrab accommodates PV frame thicknesses of 30–48 mm (if the L-flange is positioned below the stud's hex nut) and 34–51 mm (if the L-flange is positioned above the stud's hex nut).

EdgeGrab uses the same S-5-PV Kit base assembly as the universal PV grab and will work on most exposed-fastened and corrugated metal roofs.

In addition to the top-of-the-line S-5!® products, A.B. Martin also has a wide array of roofing accessories such as **roof boots, screws, cupolas, and ventilation systems** ready for fast shipment nationwide.

Let us be your warehouse!

Fasteners

A large selection of color-matched self-drilling screws for pre-engineered metal building applications.

Sealant Tape

Butyl tape sealant designed for sealing metal lap joints on low-pitched roofs. Comes on a 40' or 45' roll in various widths.

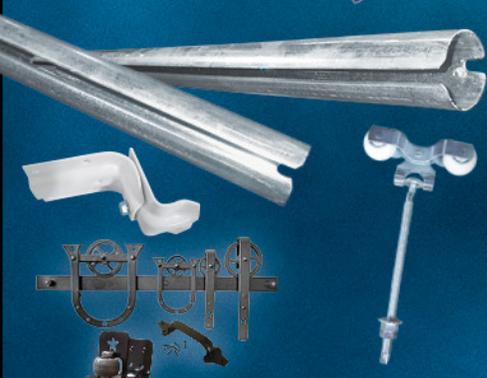

EMSeal

19.68' of EMSeal comes compressed into a .375" x 1.5" roll. Roll it out in a valley or other area that needs to be sealed and it expands up to 1.5" x 1.5". Also available in .25" x 1" compressed, 1" x 1" expanded.

Caulk

2300 Geocel caulk comes in a 10.3 fl. oz. cartridge and is available in many colors.

Sliding Door Components

Stocking a large variety of sliding door track for agrarian, industrial, and equestrian applications.

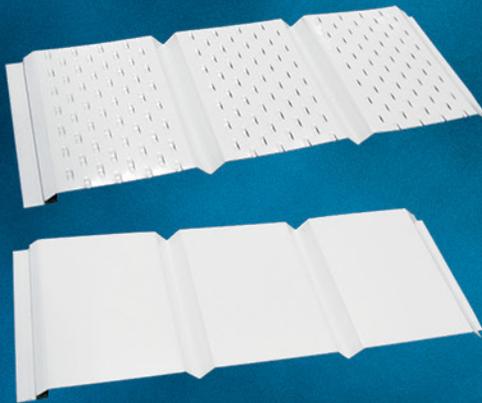

Ultra-Vent

Compresses and fits every profile with factory-applied glue for faster install.
Available in 1" thick x 1.5" wide x 20' rolls and 1.25" thick x 2" wide x 25' rolls.

MasterFlash

Many sizes and colors available.
Retrofit and silicon hi-temp boots in-stock.

Steel Soffit

Solid or vented available in 24^{ga.}, 26^{ga.}, 29^{ga.} SMP or Kynar colors.
12" wide coverage by 11.5" in-stock.
Custom overhang lengths available from 1.5 inches to 48 feet.

Milwaukee® Tools

Authorized Milwaukee® power tools dealer with fast shipping.

Cupolas

- Custom designed to match your building colors
- Four standard sizes: 16", 24", 36", & 48" square
- Louvered sides are standard
- Windows are optional on 36" and 48" cupolas
- Pre-assembled for quick installation
- Any base, wall, trim, and roof color combinations
- Vented or solid weathervane base
- Pre-installed heavy-gauge base designed to support the cupola without additional framing or flashing, custom made to match to the roof pitch

Weathervanes

In-Stock Selection

30" Buck

30" Antique Auto

30" Country Doctor

30" Eagle

30" Pheasant

30" Horse

30" Cow

30" Rooster

30" Tractor

30" Pig

30" Sailboat

30" Duck

30" Painted Tractor

46" Rooster
(Gold Bronze)

46" Horse
(Gold Bronze)

46" Sailboat
(Gold Bronze)

46" Eagle
(Gold Bronze)

Made from Rust-Proof Recycled Aluminum

A. B. MARTIN
ROOFING SUPPLY, LLC

Snow Retention • Metal Roofing Accessories

Since 1947, **A. B. Martin Roofing Supply, LLC** continues to be a leading manufacturer of building materials, metal roofing & siding panels, and a stocking wholesale distributor of some of the best metal roofing accessories in the industry.

Let Us Be Your Warehouse • *Fast Shipping Nationwide*

We buy and sell millions of screws every year, hundreds of thousands of S-5!® products, and more. The quantity discounts we get from the manufacture for buying in bulk, we pass on to our customers.
