\*See warranty documents for details.

## WHY TEXTURED?

Our textured panels continue to be very popular in residential applications.

Homeowners like it because the unique texture surface redirects sunlight for less glare than smooth panels. Plus the textured panels are less prone to "oil canning" which makes for a more attractive roof.

Contractors like it because the texture provides more grip during installation than smooth panels.

Sounds great. But will it stand the test of time?

Because the texture coating is baked into the metal coil at the factory, our textured panels carry the same 40-year paint warranty as our other panels (see warranty for details).
